Preface

“The bible identifies self-development, or self-improvement, as one of the primary tasks of the Christian. We are not to focus on the criticism and correction of others. We are to focus on the examination of ourselves. Self-improvement should be our guiding value. Know thyself is a good motto; and then do something about yourself. Look, listen, and learn from what you do and say to discern what are the needs and strengths in your life. Then turn to Jesus for your needs.” Ellen G. White, Counsels on Health, p. 107.

Revised August 2010
WHAT IS A PORTFOLIO?

“A portfolio is a place where you store things related to your training, work experience, contributions, and special accomplishments. It is the place to document all your work-related talents and accomplishments so that you have a good sense of your assets” (Colby-Sawyer College).

The portfolio is an effective tool for measuring a student’s growth and celebrating accomplishments on the continuum of beginning the social work major to the point of entry-level social work employment. The rationale for the use of student portfolios in social work education includes their capacity to foster self-reflection, integrate the learning experience, prepare students for job searches and employment, and help faculty evaluate and improve the curriculum (Rosegrant, 2004).

THE PURPOSE

The purpose of this Portfolio is to evaluate all seniors as they complete their matriculation through the Social Work demonstrate their knowledge, values and skills as competent aspiring social workers on the verge of entering generalist practice and/or preparing to enter graduate school. The Portfolio process was designed by the faculty to meet the university requirements of completing an Exit Examination before graduation and also serves as a capstone measurement tool of the student’s readiness to enter generalist practice and/or graduate education.

The Portfolio will assist aspiring Social Work graduates by:

1. Providing a way to organize and display accomplishments.
2. Provide meaningful accounts of knowledge and skills.
3. Demonstrates progress in the achievement of the Department’s goals.
4. Provides an opportunity for reflection on personal and professional development.
5. Provides a means for communicating professional and personal assets.
6. Provides visual references for use during job interviews.
7. Provides evidence of the student’s ability to interface classroom knowledge within practice.
8. Provides a unique academic profile and collection of artifacts. (Mburikura, 2006)

In addition, the portfolio process allows social work students to demonstrate their competence in displaying a facility with practice behaviors, the social work Code of Ethics, and the integration of Christian values in practice.

AN ACCEPTABLE PORTFOLIO

An acceptable portfolio will be creative, comprehensive, well organized, and neat and grammatically sound. Portfolios will receive evaluation by more than one evaluator. In order for the Portfolio to be more effective it must be well organized and professional in appearance. This portfolio is a reflection of the student to the reviewers. Please take time to carefully read this guide before you begin this assignment.
THE PORTFOLIO COMPETENCIES

The Portfolio is a key component of the Department’s assessment of each student’s readiness for professional Generalist practice. The Portfolio represents the student’s progress in achievement of the Departmental competencies and practice behaviors as outlined on pages 19 through 23 of this Handbook.

THE PROCESS

The Portfolio has been divided into two sections: written and oral. The written section must be submitted on the designated date in the course SW 480 (fall semester). This section will be reviewed by the course instructor and a grade assigned. Seniors that are not enrolled in the above course are required to turn in the completed Portfolio to the Department’s Office Manager on the same date. **There will not be a make-up date or extension for this assignment.** All Portfolios will be reviewed during the Christmas holiday break by both faculty and community advisory board members with the intent of providing critical feedback for the purpose of revisions. The assignment will be returned students for the purpose of making final revisions at the beginning of the spring semester (January). The final document must be submitted on the assigned date in late January. In early February all seniors will be scheduled to present an oral defense of portfolio.

  - Please be clear in your documentation

*Please note that this section is the chief component of your portfolio and will have the largest number of points assigned to it on the rubric.

(Below you will find examples of this requirement)
Department Competency # 1 – Identify as a professional social worker and conduct oneself accordingly.

*Practice Behavior – a. Advocate for client access to services provided with the field of Social Work.*

When I became a student intern for DHR of Madison County, I was assigned to various tasks that included visiting clients and locating donations to the agency. Later on, I was able to take part in case management and was responsible for taking the necessary steps to help clients get needed equipment that provided them a safer home. I realized that the clients of this agency should receive these services through insurance rather than donation. During my professional journey, I plan to have a part in changing this reality.

*Practice Behavior – b. Practice personal reflection and self-correction to assure continual professional development.*

In early experiences working with DHR of Madison County as a part of the requirement for the course SW455, my supervisor made it a point to ask me questions which prepared me to think about the ways I have engaged with clients and how I perceived my impact on their lives and situations. I also discussed my strengths and challenges of each visit. When I began to visit clients alone, I continued to take the time out after each visit to go over what occurred during the visit and how best to take the next steps of intervention. I focused on areas to improve on while working with clients. Taking the time to reveal this information proved to be valuable as it aids my growth as a professional, allowing me to understand myself and help me understand how to best support the client.

*Practice Behavior – c. Maintain professional roles (i.e. as a professional social worker) and appropriate boundaries.*

At my field agency I serve in the capacity of a “real” social worker, I have been assigned a case load similar to the seasoned social work professionals and must conduct myself in a professional manner as this is the expectation of all my clients. My caseload consists of adolescent teens who are looking to me for guidance, insight, and wisdom concerning how to direct their lives. When working with clients and make a conscious effort to maintain physical boundaries, limit personal information shared with clients, and maintain a professional attitude at all times. My evaluation confirms proves that I have made great strides in accomplishing this competency.
Department Competency # 3 – Apply critical thinking to inform and communicate professional judgments.

*Practice Behavior – a. Distinguish, appraise, and integrate multiple sources of knowledge, including research based knowledge and practice wisdom.*

In SW340, we were asked to critically analyze various social work theories and apply them to practice situations. One theory I analyzed was racial identity theory. This analysis was utilized within my field practicum experience at Tommy John Detention Center, where I counseled young men and women from various racial groups and provided me a context for understanding their racial development and interpretation of the world.

Department Competency # 6 – Engage in research informed practice and practice informed research.

*Practice Behavior a. use research evidence to inform practice.*

As a part of my research in social work course (SW420), I was involved in a series of research projects which included Program Evaluation, Focus Groups, Single-Subject Research Design, and Qualitative Research. In the Program Evaluation research project I conducted a Client Satisfaction survey in an attempt to research the experiences of freshmen students at Oakwood University, and sought to gain insight on the positives areas of their experiences as well as the challenges. The evidence obtained from this research project was used by the Center for Academic Success as evidence-based data that was utilized to improve their program for the upcoming year.

Department Competency # 12 – Demonstrate a commitment to Christian service within the community.

*Practice Behavior a. Identify biblical principles underlying Christian service and engage in service-learning activities.*

In the bible, Mark 12: 29-31 discusses the “Two Great Commandments” love for God, and second love for our fellow humans. This text is a clear indicator that we as Christians should live a service oriented lifestyle. Our Christian Social Work belief system is at the heart of this commandment, and our Department has encouraged us to implement this as a part of our practice. As one of the leaders in the Social Work Club, I have had numerous opportunities to implement Christian Service; one of my main responsibilities was to foster relationships with our club and other community organizations. One way in which this was accomplished was by arranging outreach activities with a youth ministries organization that was facilitated by a counselor of for a local church. I was able to infuse Christian principles of the “Fruit of the
"Spirit” within this ministry by helping youth devise creative ways to improve their behaviors.

### 14. Social Work Self Efficacy Scale (SWSES)

The following scale is designed as a self-evaluation tool of your knowledge and skill development within the Social Work program. Complete the following Social Work Self-Efficacy Scale. The scale results are **NOT included in your Portfolio evaluation**, but you are required to complete it. **Please take time to reflectively respond to each question. After completing this, write a short (no more than two paragraphs) synopsis of what you learned about your professional growth based on the general content within this scale. Include a completed copy of this scale along with the written response in your Portfolio.**

15. The Lifelong Learning Questionnaire (LLQ)

The Lifelong Learning Questionnaire (LLQ) may help you to consider various aspects of yourself as a lifelong learner. There are no right or wrong answers. Rather, the questionnaire may be used to stimulate reflection about your “learning self.” Therefore, please consider your results as hypotheses to examine in the context of evidence from other sources. Again, this component will NOT be graded; however, you must complete this in order to complete the Portfolio assignment. **After completing this, write a short (no more than two paragraphs) synopsis of what you learned about your professional growth based on the general content within this scale. Include a completed copy of this questionnaire along with the written response in your Portfolio.**

Please read the following statements. Indicate your degree of agreement or disagreement with each statement by using the following codes:

1 = Strongly Agree
2 = Agree
3 = Disagree
4 = Strongly Disagree

___ 1. I regularly read professional journals in my field.
___ 2. I genuinely enjoy learning.
___ 3. I always do more than the minimum requirements in courses, seminars, or workshops.
___ 4. I regularly pursue opportunities to advance my knowledge and expertise.
___ 5. I never become defensive when someone offers feedback that could improve my knowledge and skill.
___ 6. I like to study.
___ 7. I know my personal learning style.
___ 8. I am actively involved in learning experiences.
___ 9. I take personal responsibility for my own learning.
___ 10. I view examinations as a way to learn.
___ 11. I know how to conduct a professional literature review.
___ 12. I sometimes contact national and international experts in my learning efforts.
___ 13. I have a list of learning goals.
___ 14. I have specific plans to advance my learning.
___ 15. I enjoy teaching others.

**LLQ Score**

The Lifelong Learning Questionnaire is scored by adding your ratings to each of the 15 items. The sum represents your LLQ score. Scores between 15 and 60 are possible. Lower scores indicate greater strength in lifelong learning. Although we are still developing the Lifelong Learning Questionnaire, you may wish to consider your score in relation to the average score of a convenience sample of social work students. Twenty-one members of a first-year MSW practice class completed the LLQ in January 1999. They reflected an average score of 33.10 (range 20 – 43).
16. The Social Work Interest Instrument

Indicate your current level of interest in each social work position by circling the number that best reflects your preference. Since this is not an exhaustive list, you may add other social work positions. You may also find it useful to refer back to this instrument periodically throughout your social work career. Your interests could change from time to time. **Please write a short synopsis of the top three areas of social work that you are interested in pursuing and why?**

Jesus is still intimately involved in the affairs of mankind and is a present force in clinical interactions in social work interventions.
